Many people know that eating healthy food and exercising are two of them. Something else people can do is to spend time outside, in nature. Doing these simple things can help you to have a better life now and will help you to live longer and happier in future.</p> <p>One of the best things you can do for your body is doing exercise. People exercise to keep healthy. They also exercise to lose weight. Doing exercise can be fun and can make you feel good. But how much is enough? Some people think that doing simple things like cleaning the house are helpful and enough. Other people do heavy exercise every day such as running or swimming. One thing scientists agree on is that any kind of exercise is good for you.</p> <p>Having healthy diet can help improve people's health condition.
