۱۴- This is a Dictionary.

۱۵- My grandma is hard of hearing.

۲

Change the sentences into the passive form.

۱۶- she makes pancakes everyday:

۱۷- doctors have made a new medicine to cure cancer:

۶

۲

Put the words in a correct form.

۱۸- Mohammad –a dentist – likes to – become:

۱۹- is- spoken- persian – in- Iran – and – Afghanistan:

۷

۶.۵

Reading: Read the following texts and answer the questions.

Text 1:

Galileo Galilei was born in the year 1564. He was born in the town of Pisa, in what is now Italy.

When he was 20 years old, he was studying in Pisa. His father wanted him to be a doctor.

Galileo

was bored with school. The only subject he really liked was math. Because he was doing well in

math, the court mathematician offered to tutor him privately He said he

could become a qualified mathematician. Galileo's father was disappointed, but he agreed.

Because he needed to earn money, Galileo began experimenting with different things. He

tried

to come up with an invention he could sell for money. He had some success with one

invention.

It was like a compass that could be used to measure land. He experimented with pendulums,

thermometers, and magnets.

He heard that a Dutch inventor had invented something called a spyglass. The inventor was

trying to keep it a secret. Galileo decided to work on one of his own. Within 24 hours, he had

۸

invented a telescope. It could magnify things to make them appear ten times larger than real life.

One night, he pointed his telescope toward the sky. He made his first of many space observations.

Everyone thought the moon was smooth. Galileo saw that it wasn't. The moon was covered in bumps and craters.

As technology has improved, Galileo and many others have made improvements on the telescope. Today, the telescope is a wonderful device that lets us see objects far, far away.

٢٠- What did Galileo's father want him to be?

٢١- Why did Galileo become an inventor?

٢٢- Where did Galileo get the idea for his telescope?

٢٣- What did Galileo discover about the moon?

Text 2:

In most Asian countries, bamboo is nearly as important as rice. Many Asians live in bamboo houses. They sit on bamboo chairs and sleep on bamboo mats. They fence their land with bamboo

and use the wood for cages for chickens and pigs.

Bamboo is used to build large buildings as well as homes. When it is glued in layers, it becomes

as strong as steel. On some islands in the South Pacific, bamboo is even used for water pipes.

This extraordinary material has many other uses. It is used to make musical instruments, such as flutes and recorders. Paper made from bamboo has been highly prized by artists for thousands of years.

Bamboo is light and strong, and it bends without breaking. It is cheap, floats on water, almost never wears out, and is easy to grow. Nothing else on earth grows quite so fast as bamboo. At times you can even see it grow! Botanists have recorded growths of more than three feet in just

twenty-four hours! Bamboo is hollow and has a strong root system that almost never stops growing and spreading. In fact, only after it flowers, an event that may happen only once every thirty years, will bamboo die.

There are more than a thousand kinds of bamboo. The smallest is only three inches tall and

one-tenth of an inch across. The largest reaches more than two hundred feet in height and seven

inches in diameter. No wonder, then, that the lives of nearly half the people on earth would change enormously if there were no longer any bamboo. No wonder, too, that to many people bamboo is a symbol of happiness and good fortune.

٢٤- What is the main idea of this passage?

- a) Bamboo grows at an amazing rate and is found mainly in Asia.
- b) Bamboo is an amazing grass that can be used in countless ways.
- c) There are at least one 1000 types of bamboo.
- d) Bamboo could be considered a flower in some cases.

٢٥- What does "it" in paragraph ٣ line refer to?

٢٦- What happens when a bamboo flowers?

٢٧- We understand that many people's lives depend on the existence of bamboo. True / False
